Subject: Friday's UIC meeting

Hi Steve,

We wanted to reach out to you in advance of the meeting this Friday to share some thoughts about follow-up to last week's Report to the Legislature. In particular, we would like to talk with DOGGR and the Water Board Friday about the need to triage the state-wide injection project reviews. Much as we sought last year to focus on the disposal wells first and to identify shorter-term analyses/evaluations to address potential impacts to water supply wells, we now see a similar need to discuss prioritization of the state-wide project reviews and any additional evaluations that would be helpful in addressing potential shorter-term public health concerns. We are interested to hear the State's ideas about this prioritization of work and thought it best to give you a bit of time to consider the matter before Friday. In addition, we wondered whether it might be useful to have someone from the Monitoring and Compliance Unit come on Friday to further discuss the findings, also in the context of deciding where to prioritize project reviews and other potential work.

We'll get a full draft agenda for the meeting out to the larger distribution list later today or early tomorrow.

Thanks,

David
